## Tieback Seal Bore

KX Oil Tools Tieback Seal Bore is utilized in conjunction with a packer or connecting sub, to create a component for which pressure isolation can be created from the tubular side to the annulus. The Tieback comes standard in 6ft, 10ft, 15ft, and 20 ft lengths, or can be shortened in length to act as a re-entry guide, to allow for easy transition in and out of the seal bore.

### APPLICATIONS

- Production
- Injection
- Stimulation

### FEATURES, BENEFITS & ADVANTAGES

- Tapered/beveled top end for ease of entry
- Box down designed to mate to associated product
- Completely configurable pending on well design
