Mechanical Single Cone LH

KX Oil Tools Mechanical Single Cone Liner Hanger is a simplistic design, incorporating an auto-jay, and friction bow springs to anchor the jay cage against pipe movement. At setting depth with first movement up, imparting left or right torque and setting down (depending on jay configuration), will allow the pins to travel the jay profile, and the slips to contact the cone and travel out to the casing wall anchoring the liner in place.

APPLICATIONS

- Production
- Injection
- Stimulation

FEATURES, BENEFITS & ADVANTAGES

- Full ID liner access
- Can be run in conjunction with a liner swivel to separate liner movement from the setting sequence
- Running profiles can be setup to fit running tool
- Two piece or integral mandrel can be setup
- Standard setup for right hand rotational release
