Big Bore Setting Tool

KX Oil Tools Big Bore Setting Tool is a dual piston hydraulically activated setting tool, used to set wireline equipment that is run on jointed pipe or coiled tubing. This version of the tool comes with a blanked mandrel, eliminating the need for a secondary plugging device, and drains once the tool is fully stroked out.

APPLICATIONS

- Setting Permanent Packers and Bridge Plugs
- Setting Retrievable Packers and Bridge Plugs

FEATURES, BENEFITS, AND ADVANTAGES

- Large Piston Area Resulting in Low Setting Pressures
- Baker #20 Equivalent Lower Adapter
- Adjustable Initiation Shear Pins
- No Rotation Required
- Tool Drains Once Plug or Packer is Set
- Easy to Redress
