Eccentric Nose Float Shoe

KX Oil Tools Eccentric Nose Float Shoe is a casing floatation device that allows for the casing to be floated to bottom using a reliable dual check valve design. The Eccentric Nose Float shoe can aid in getting casing to bottom, as the robust aluminum nose allows for casing to be manipulated when ledges or obstructions are encountered in the open hole.

APPLICATIONS

- Primary Cementing
- Liner Deployment
- Casing Deployment

FEATURES, BENEFITS & ADVANTAGES

- Full ID liner once drilled out
- PDC Drillable valves and nose
- Directional jetting ports
- 5000psi Pressure Rating
- 300F Temperature Rating
