Liner Wiper Plug Landing Collar

KX Oil Tools Landing Collar is run as a part of the casing/liner string and is usually placed just above the float equipment. The KX Landing Collar is designed to accept the KX Liner Wiper Plug. Once the KX Liner Wiper Plug lands in the KX Landing Collar it becomes latched down and sealed in place. The KX Landing Collar in conjunction with the KX Liner Wiper Plug will now hold differential pressure from above and below.

APPLICATIONS

- Cementing

FEATURES, BENEFITS, AND ADVANTAGES

- Latch down design in seat eliminates concerns with flow back of pressure or fluids
- Internal components are manufactured from drillable materials
- 10,000psi pressure rated from above and below
