Hydraulic Set Permanent Liner Top Packer

KX Oil Tools Permanent Liner Top Packer is versatile liner top packer that can be used in stimulation, injection, and production applications. The KX Permanent Liner Top Packer comes with a built in setting piston that eliminates the need for accessory running tools and the robust upper and lower slips provide secure anchoring in the casing.

The tool comes with an adjustable initiation shear which gives the operator the ability to tailor the tool to a wide range of well conditions. When run in conjunction with the KX Oil Tools Tri-Jay Shorty TieBack Receptacle and Tri-Jay Shorty Seal Nipple the KX Permanent Liner Top Packer provides the operator with a versatile liner top that can be run in cemented and uncemented applications.

APPLICATIONS

- Production
- Injection
- Stimulation

FEATURES, BENEFITS, AND ADVANTAGES

- Integral Hydraulic Piston
- Field Adjustable Initiation Pressures
- Reliable Slip System
- Proven Design and Sealing System
