

### STANDARD OFFERING

- Aluminum Metal Components
  - NBR Elastomers

### OPTIONS

- Elastomers

## Liner Wiper Plug

KX Oil Tools Liner Wiper Plug wipes the internal ID of the casing or liner section of the well bore, while maintaining fluid separation, and indicating fluid displacement once latched into the KX Landing Collar. With an upper profile to accept the sealing KX Drill Pipe Wiper plug, the LWP will release from the Separation Sub once the required differential pressure is achieved, and will travel along the well in conjunction with the DPWP to the lower Landing Collar locking all components in place with pressure isolation.

### APPLICATIONS

- Cementing

### FEATURES, BENEFITS, AND ADVANTAGES

- Prevents cement contamination by segregating displacement fluids from cement
- Latch down design eliminates concerns with flow back of pressure or fluids
- Manufactured from drillable materials
- Dual seals on plug nose offer secondary back up in case leading seal is damaged
- 10,000psi pressure rated from above and below
